Contact us at info@datalab.eu or call us at (+386) 1 252 89 50, Our sales associates will answers any questions you might have.
PANTHEON allows you to do business at home and abroad. It’s localized to ensure compliance with local legislation and translated into several languages. These localizations and translations can be freely combined, thereby ensuring that the program fit your specific needs. If, for example, you have a subsidiary in Croatia with a German-speaking managing director, you can use the Croatian localization with a German translation to ensure seamless communication.

Consolidation is simple and fast if the whole group of companies is using the same program. You have a complete overview of your business in one place, without manual data or document exchanges. Plan, manage, and monitor your entire business with one program so that you can be successful at home and abroad.

Join the PANTHEON Community

We're there for you from the very start, helping you choose the right license, providing training to make the first steps easier, and assisting you with any problems you may encounter. We provide a lot of additional information on our user site, and blog. If you need help, contact us. If you seek knowledge, we're here for you.

A solution tailored to your business’s needs.

PANTHEON is available in several editions with different features sets. When your company grows, you can simply upgrade your license to a more advanced edition, without having to re-install the software or migrate your data. Each higher-level edition contains all features of its predecessors.

When upgrading, you only have to pay the difference between the editions, saving your initial investment.

You can find our price list and more details about the licenses at [www.datalab.eu/prices-and-functionalities/](http://www.datalab.eu/prices-and-functionalities/)

Try PANTHEON, download the demo at [www.datalab.eu/pantheon/demo/](http://www.datalab.eu/pantheon/demo/)

When deciding on the right solution, consult our sales representatives at info@datalab.eu

You can find our price list and more details about the licenses at [www.datalab.eu/prices-and-functionalities/](http://www.datalab.eu/prices-and-functionalities/)

Try PANTHEON, download the demo at [www.datalab.eu/pantheon/demo/](http://www.datalab.eu/pantheon/demo/)

When deciding on the right solution, consult our sales representatives at info@datalab.eu

Our consultants will help you choose the perfect solution to optimize your business processes. We'll do our best to answer all your questions.

[info@datalab.eu](mailto:info@datalab.eu)

[+386 1 252 89 50](tel:+386%201%20252%2089%2050)

Our support partners provide support on-site or remotely, and communicate with Datalab regarding fixes and suggestions for improvements.

[www.datalab.eu/support/support-partners/](http://www.datalab.eu/support/support-partners/)

Datalab Academy organizes training courses, workshops, certification, and conferences for users and partners.

[www.datalab.eu/academy/](http://www.datalab.eu/academy/)

Knowledge is power. The Datalab team shares their knowledge: advantages of cloud-based business, changes in legislation and how to adapt to them, best practice examples, business solutions for companies of all sizes, Datalab news and events, and much more.

[www.datalab.eu/blog/](http://www.datalab.eu/blog/)

Datalab’s support department primarily focuses on providing support to support partners with more complex questions submitted through the Help Desk application. User can ask for help from support partners, who can provide remote support services.

[www.datalab.eu/support/](http://www.datalab.eu/support/)

The user site contains freely-accessible user manuals (video and traditional), announcements, a forum, etc. It's a free knowledge base for all PANTHEON users.

Doing Modern Business Means ...

PANTHEON Cloud

Instead of buying PANTHEON, you can lease the solution as a cloud-based solution, thereby avoiding a large initial investment into software and hardware, giving your company an edge. You can allocate those resources to help you grow instead, while using top-of-the-line ERP software.

PANTHEON Cloud includes:
- Using any of the PANTHEON editions
- Data archiving
- Program upgrades – legislation and features
- Server rent and maintenance
- All the required licenses

To deliver the best possible PANTHEON Cloud experience, we're cooperating with leading telecommunication service providers in the region: Telekom Slovenije, Hrvatski Telekom, Telekom Srbija, BH Telecom, Makedonski Telekom and IPKO (Kosovo).

Start Doing e-Business –
Make Your Business Faster and Lower Your Costs

E-Document Exchange, Document System, and Workflow: A great choice for every business – from small entrepreneurs to accounting firms working with several databases

- Easy and secure document exchange and storage
- Faster processing, so more time for analyses and consulting
- Less time spent dealing with bureaucracy
- Accessible any time anywhere over the Internet
- Issue and receive e-invoices and other procurement or shipping documents
- Electronic archive
- Many support options
- No upfront investment, pay-per-use

These three modules represent a revolutionary development in ERP systems. **E-Document Exchange** allows you to connect your company to outside data sources, such as CRM, X.400, e-mails, etc. E-mails, file transfers, web services, and others are supported.

**The Document System** allows you to scan and track all the (usually paper) documentation in your company; from accounts receivable, contracts, product descriptions, even manuals for the machinery from your fixed asset register. Each document can be annotated, enriched with company specific metadata, and stored in a digital archive.

**The Workflow Module** is the connecting piece – an engine describing tasks needed for the completion of a work process that can be defined based on specific requirements of each company. For example, when a supplier’s invoice is received, it is first scanned by Joe, then signed by Mary, then signed by Mary’s boss, Martha, and submitted to accounting, where it is first converted to an e-Invoice, so that Jane can post it to the general ledger with a single click.

You can find out more about e-business at www.datalab.eu/ebusiness/
Affordable, Successful, Accessible.

PANTHEON Retail – Mobile and advanced cash register solutions. Complete, flexible, and affordable.

The PANTHEON Retail mobile cash register uses the Android operating system and is designed for businesses that are often on the move, or are in the service industry.

A more complex PC cash register, suitable for restaurants and bars, as well as the retail and service industry, will satisfy even the most demanding users, who want to manage their POS effectively. This product line is complemented by an independent POS terminal capable of accepting cash and card payments.

Ensure that your employees have reliable and user-friendly tools to make their work faster and more efficient.

Predefined, Simple, and Precise – ZEUS Business Intelligence

Included in PANTHEON is the powerful business intelligence system ZEUS, which offers reporting, analyses, dashboards and planning for various fields of business. You will find relevant information in huge amounts of data fast and simple, which is critical when you need it most – when making key decisions.

- Analyze your achievements and your position in the market.
- Track your progress.
- Monitor your growth.
- Find relevant information quickly and easily.
- Visualize your data as you see fit.
- Make use of the accounting reports prepared automatically by PANTHEON and delivered straight to your inbox at a specified time.
- Use simple drag-and-drop analyses ...
- or pivot tables, graphs (drill-down, pivot dimensions, drill-through, indexes, image export, Excel export) for more demanding users.
- Plan sales, payroll, and more using PANTHEON’s business plan generator.
- Compare what you planned to your actual performance.
- Monitor your business’s key indicators using the dashboard.
